

# The SLOPE of a position-time graph is the velocity at that time!

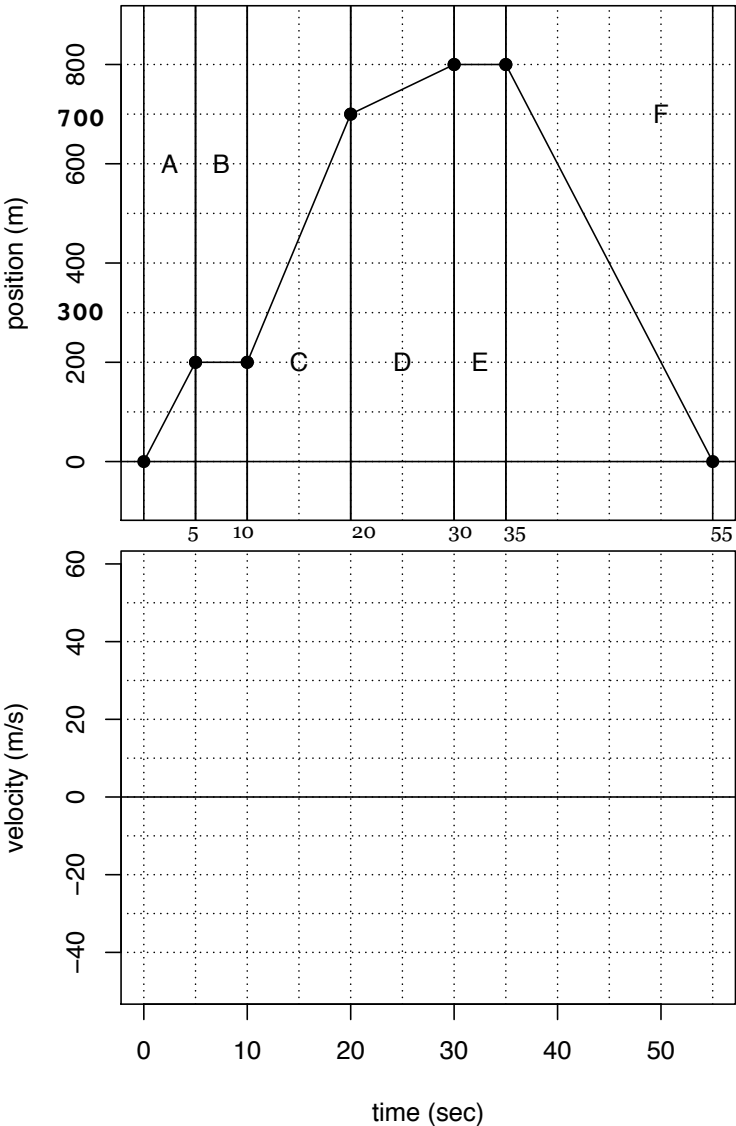

## Question 1

- Find the slope in each section of the position-time graph.
- Draw the corresponding velocity-time graph.

Question 2

- Find the slope in each section of the position-time graph.
- Draw the corresponding velocity-time graph.

slope of section A

slope of section B

slope of section C

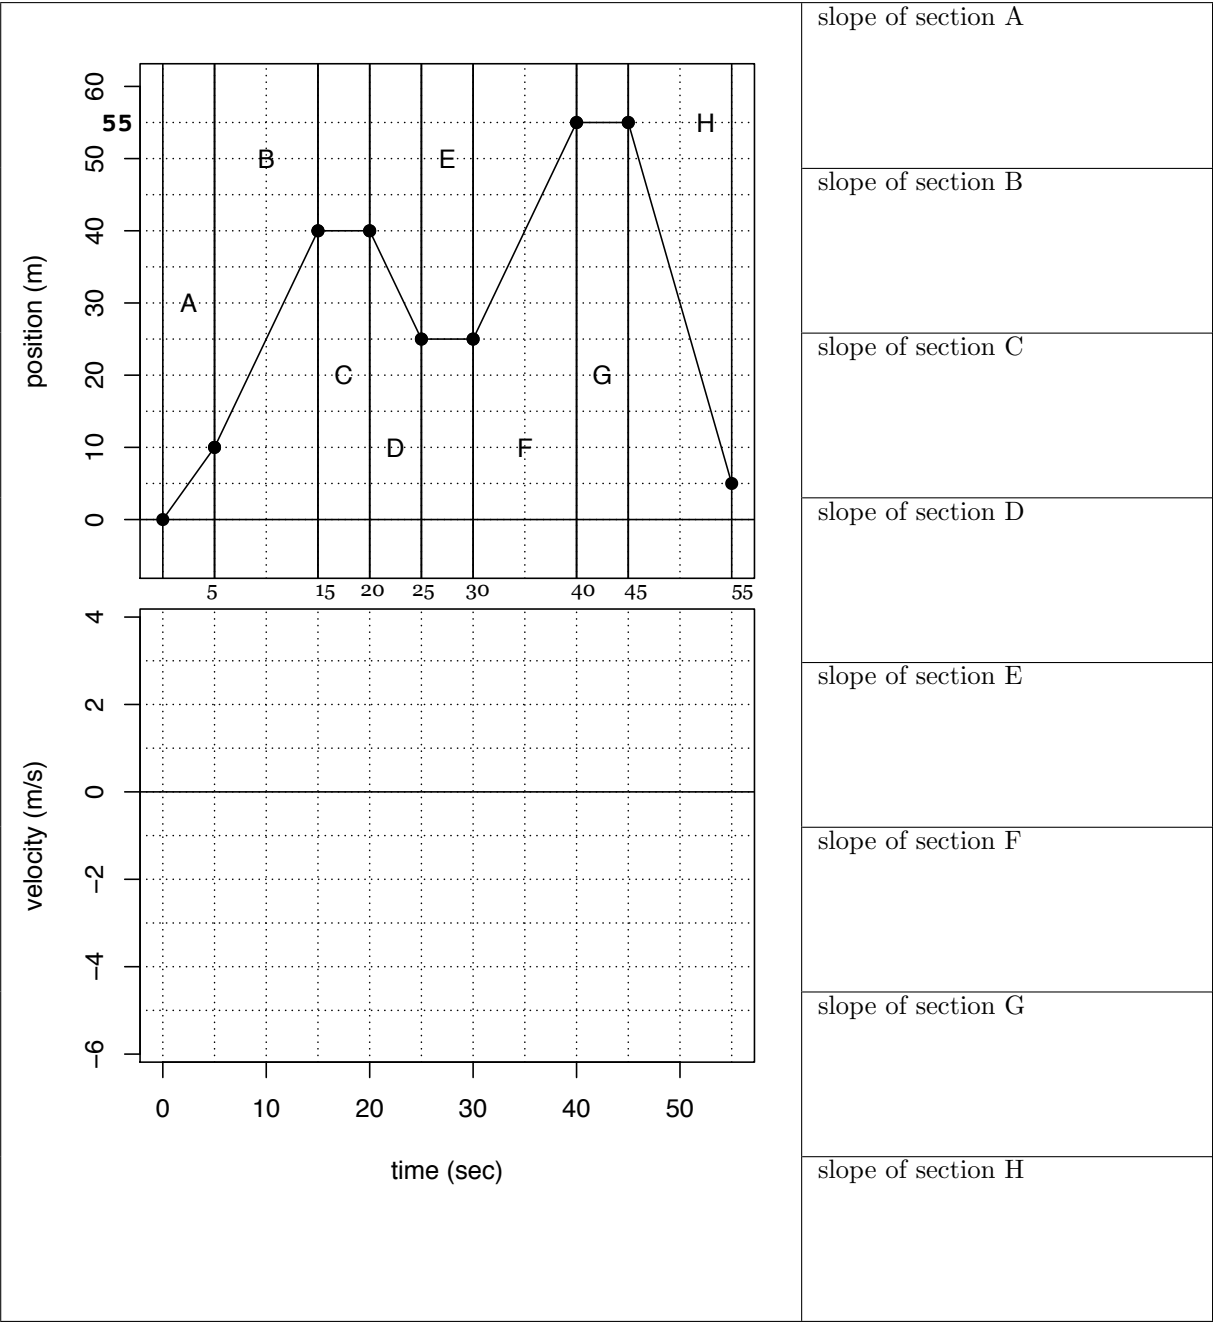

slope of section D

slope of section E

slope of section F

Question 3

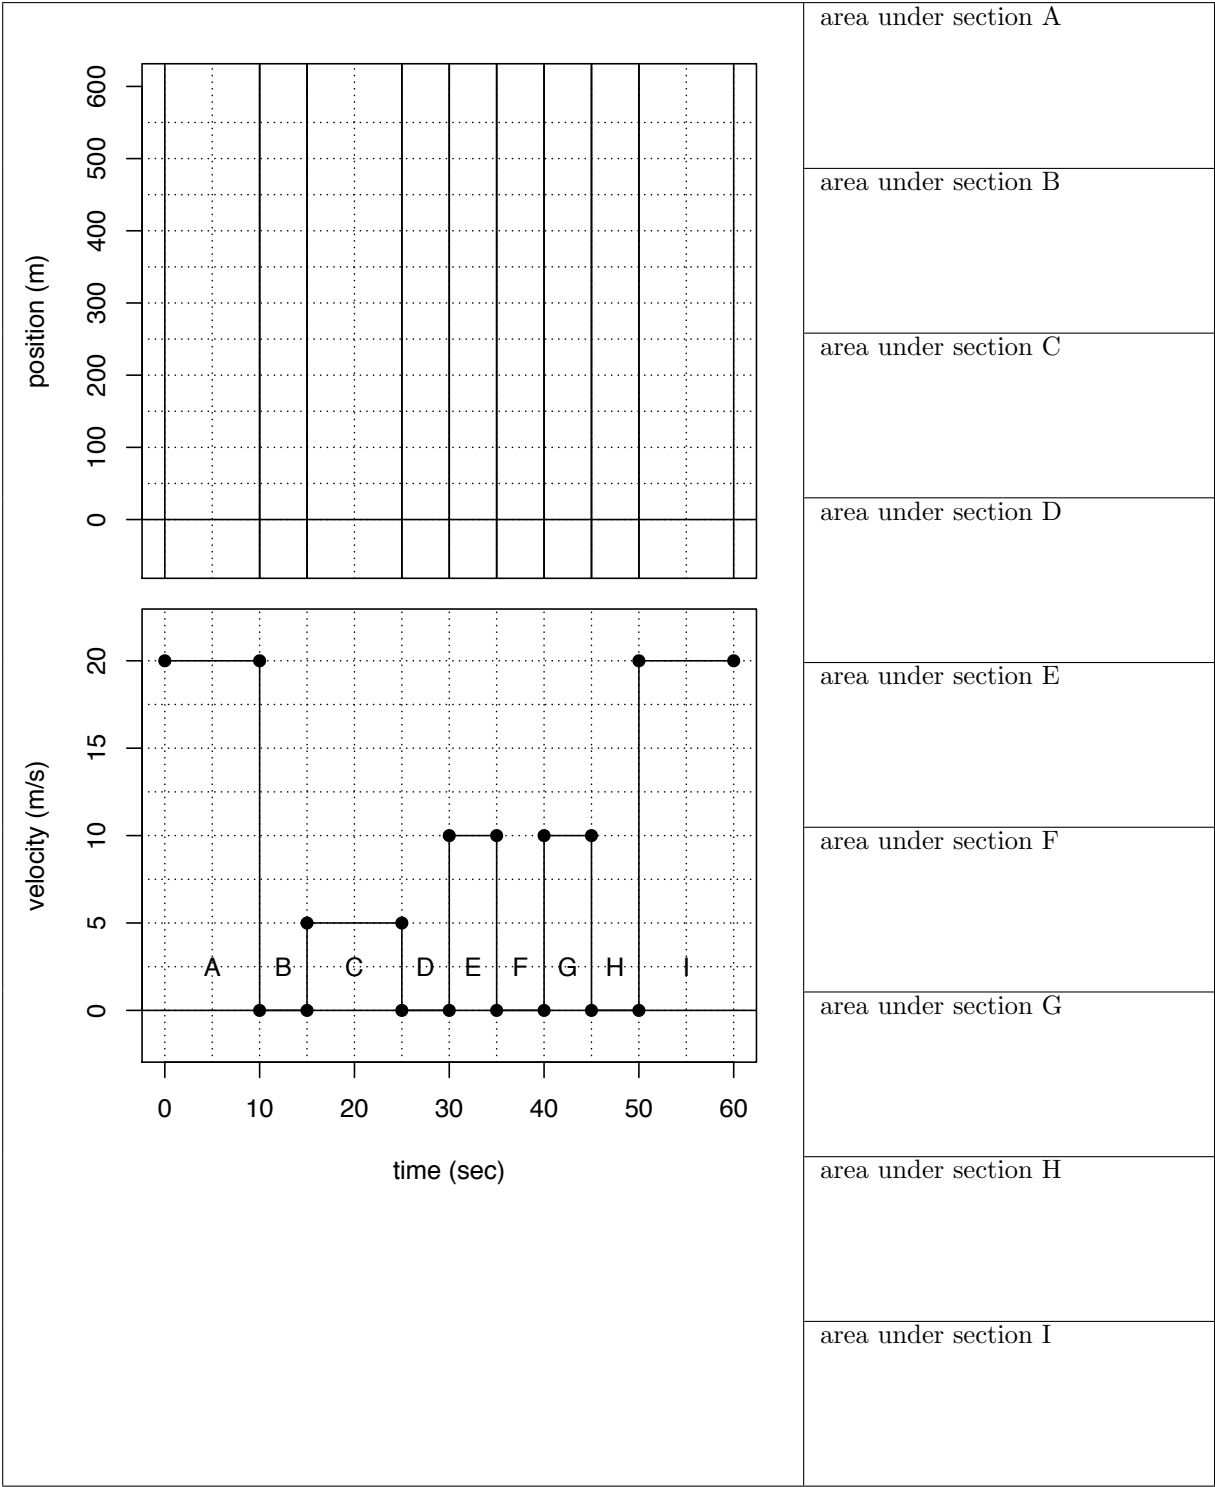

- Find the slope in each section of the position-time graph.
- Draw the corresponding velocity-time graph.

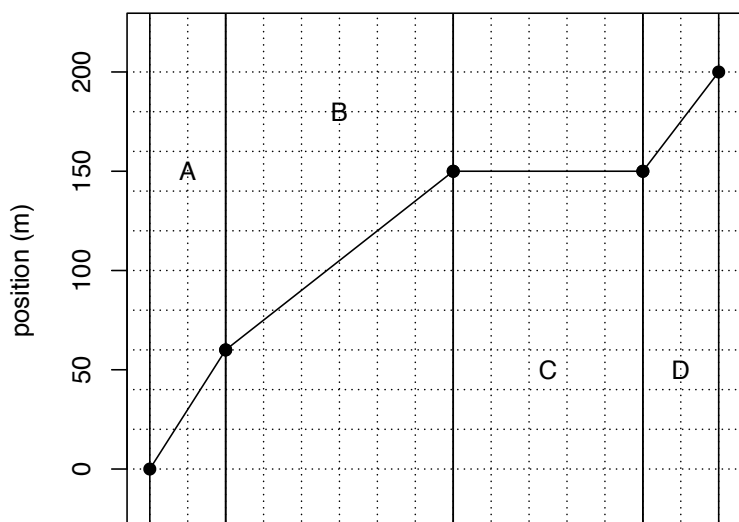

# The AREA under a velocity-time graph is the change in position of that range!

Question 4

- Find the area under each section of the velocity-time graph.
- Draw the corresponding position-time graph, assuming initial position = 0.

Question 1: Answer

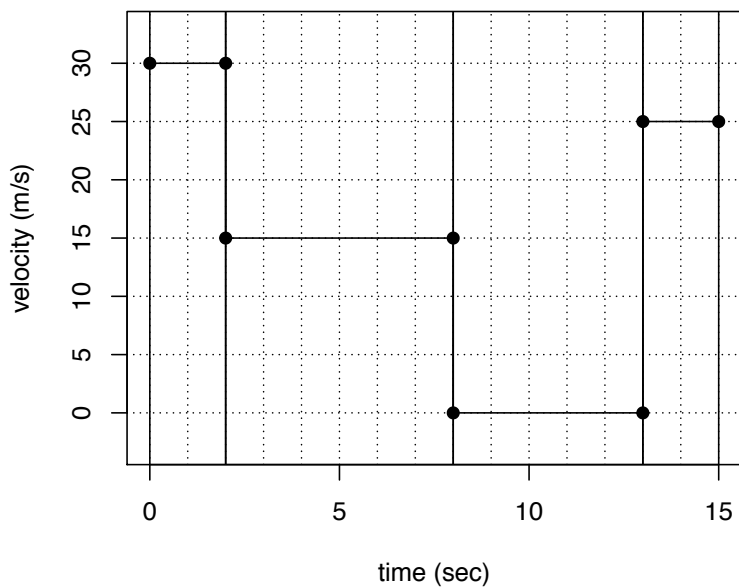

slope of section A  
30 m/s

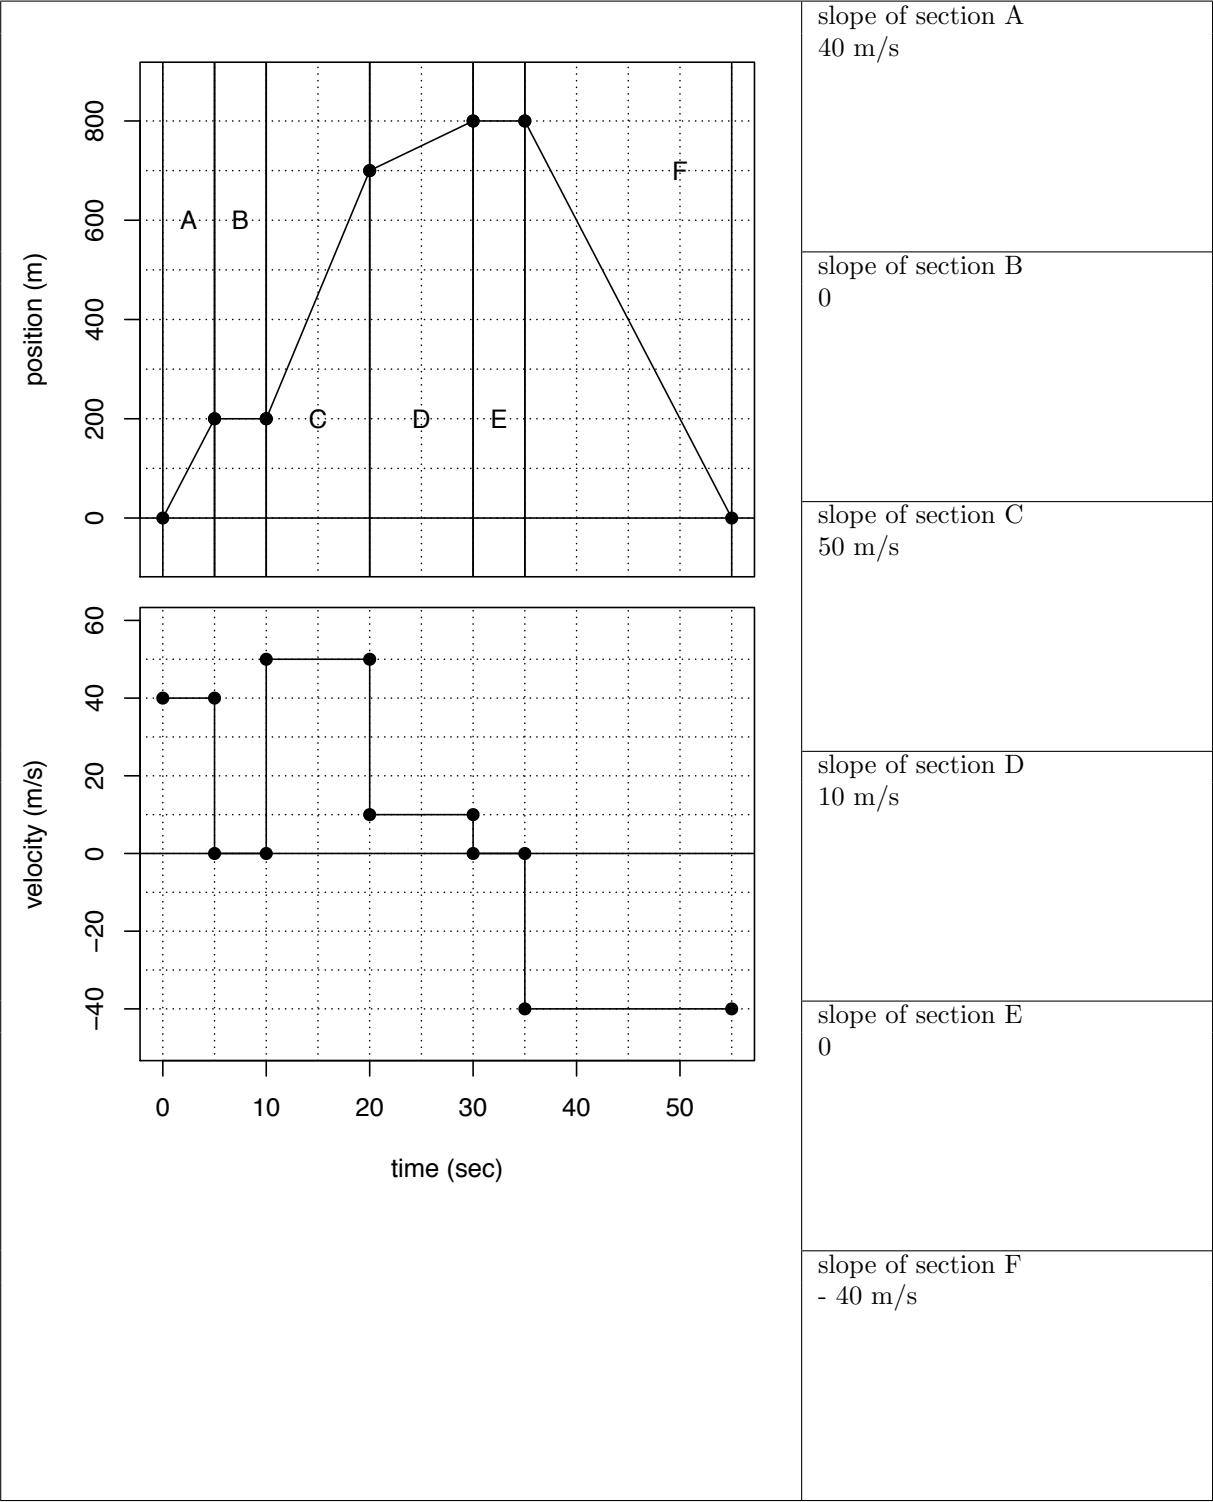

slope of section B  
15 m/s

slope of section C  
0

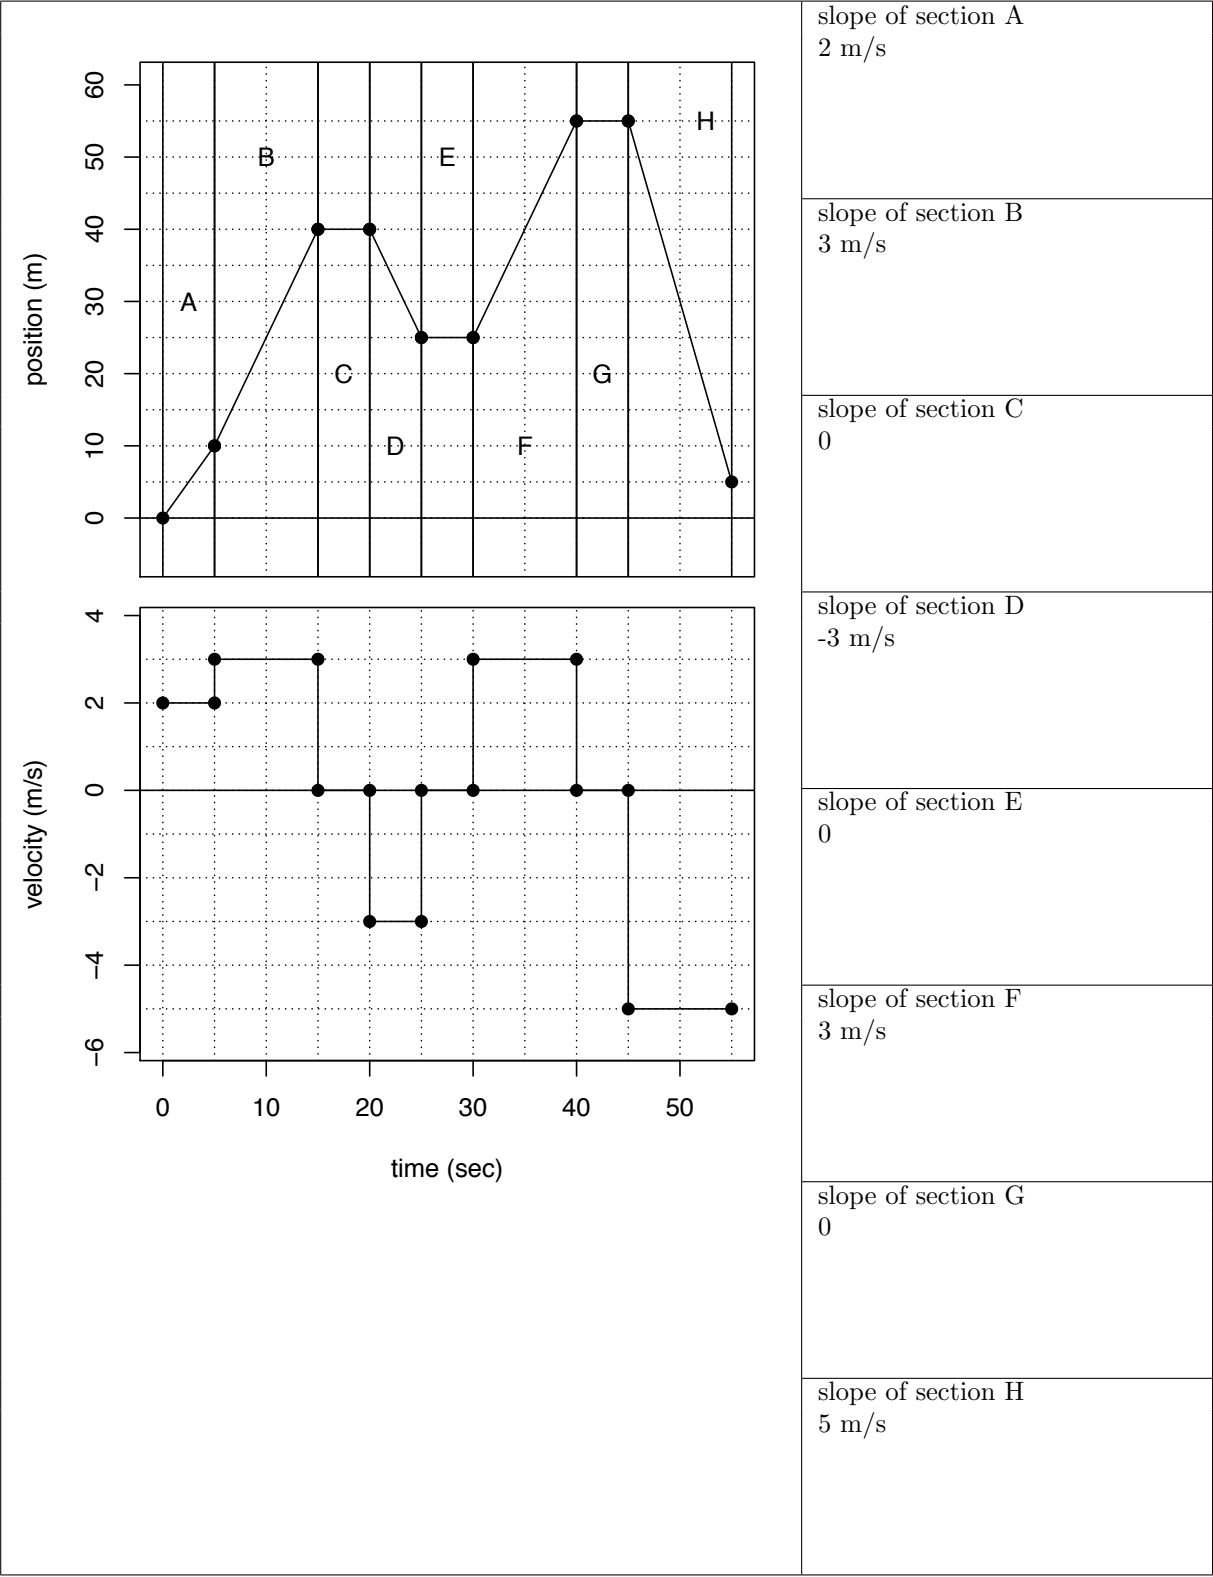

slope of section D  
25 m/s

Question 2: Answer

Question 3: Answer

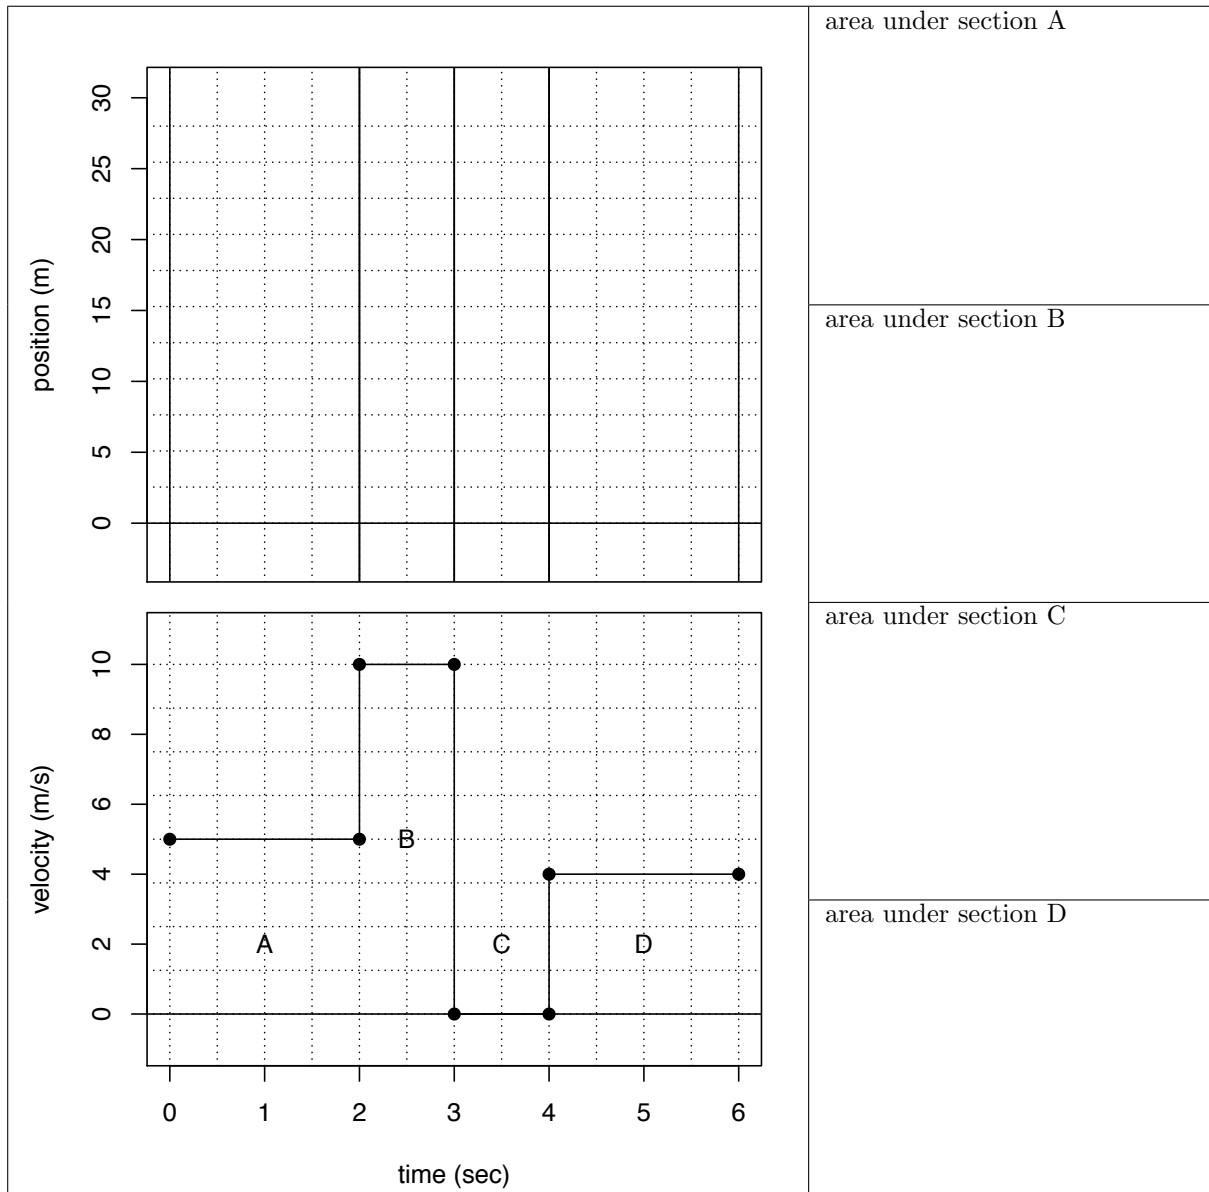

Question 4: Answer

<div><table><caption>Position-time graph data</caption><tr><th>Time (sec)</th><th>Position (m)</th></tr><tr><td>0</td><td>0</td></tr><tr><td>10</td><td>200</td></tr><tr><td>15</td><td>200</td></tr><tr><td>25</td><td>250</td></tr><tr><td>30</td><td>250</td></tr><tr><td>35</td><td>300</td></tr><tr><td>40</td><td>300</td></tr><tr><td>45</td><td>350</td></tr><tr><td>50</td><td>350</td></tr><tr><td>60</td><td>550</td></tr></table></div> <div><table><caption>Velocity-time graph data</caption><tr><th>Time (sec)</th><th>Velocity (m/s)</th></tr><tr><td>0</td><td>20</td></tr><tr><td>10</td><td>20</td></tr><tr><td>15</td><td>5</td></tr><tr><td>25</td><td>5</td></tr><tr><td>30</td><td>10</td></tr><tr><td>35</td><td>10</td></tr><tr><td>40</td><td>10</td></tr><tr><td>45</td><td>10</td></tr><tr><td>50</td><td>20</td></tr><tr><td>60</td><td>20</td></tr></table></div>	Time (sec)	Position (m)	0	0	10	200	15	200	25	250	30	250	35	300	40	300	45	350	50	350	60	550	Time (sec)	Velocity (m/s)	0	20	10	20	15	5	25	5	30	10	35	10	40	10	45	10	50	20	60	20	area under section A 200 m
Time (sec)	Position (m)																																												
0	0																																												
10	200																																												
15	200																																												
25	250																																												
30	250																																												
35	300																																												
40	300																																												
45	350																																												
50	350																																												
60	550

40	10																																												
45	10																																												
50	20																																												
60	20																																												
area under section B 0 m																																													
area under section C 50 m																																													
area under section D 0 m																																													
area under section E 50 m																																													
area under section F 0 m																																													
area under section G 0																																													
area under section H 50 m																																													
area under section I 200 m																																													

### Question 5

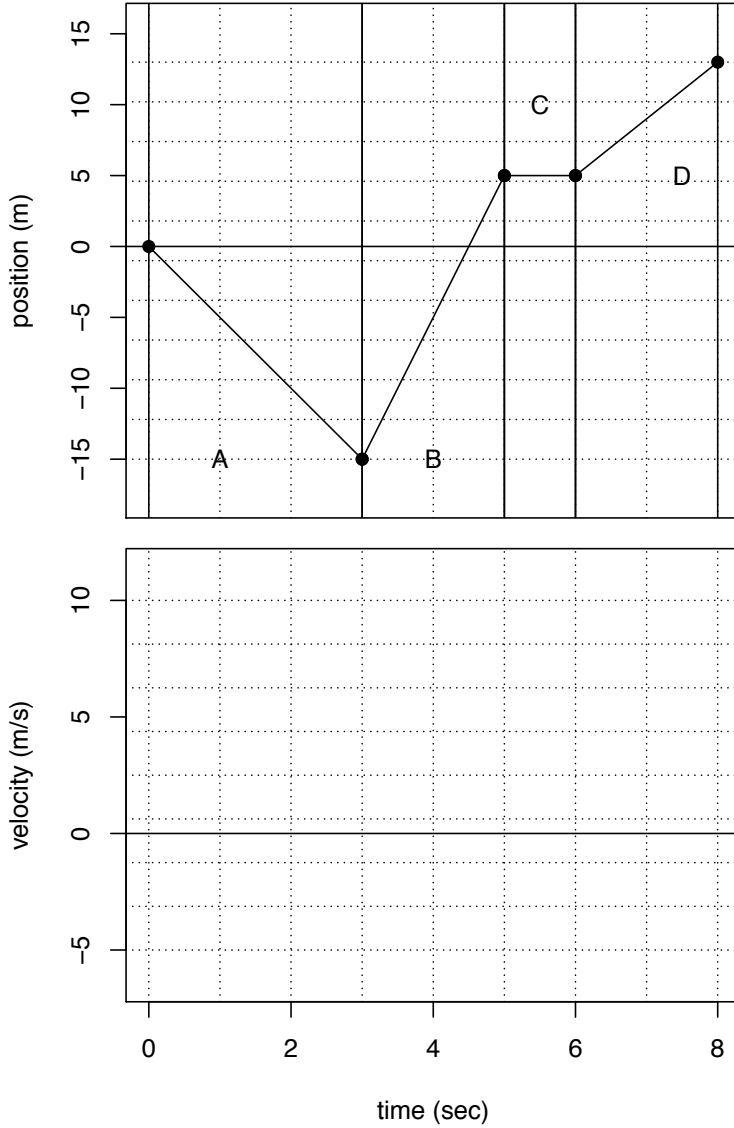

- Find the area under each section of the velocity-time graph.
- Draw the corresponding position-time graph, assuming initial position = 0.

# Question

6

- Find the slope in each section of the position-time graph.
- Draw the corresponding velocity-time graph.

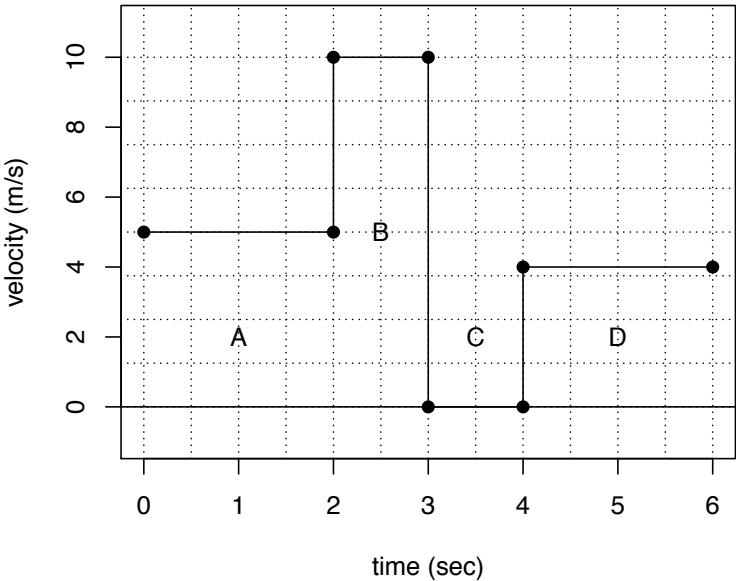

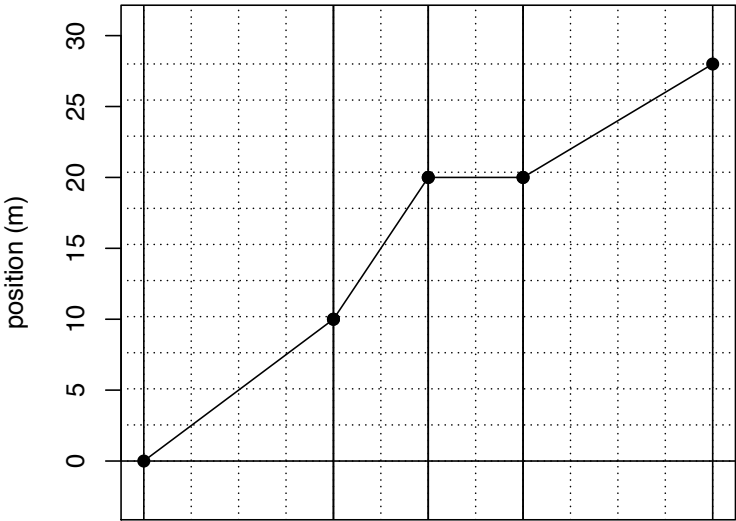

slope of section A

slope of section B

slope of section C

slope of section D

Question 5    Answer

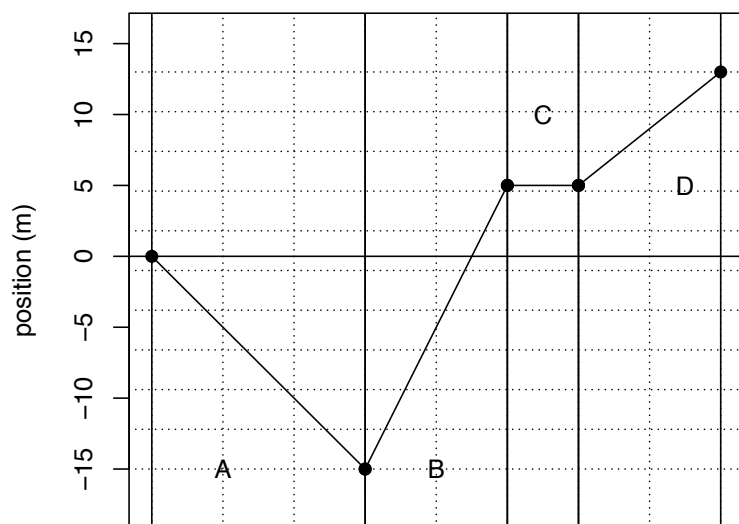

area under section A  
10 m

area under section B  
10 m

area under section C  
0 m

area under section D  
8 m

Question 6 Answer

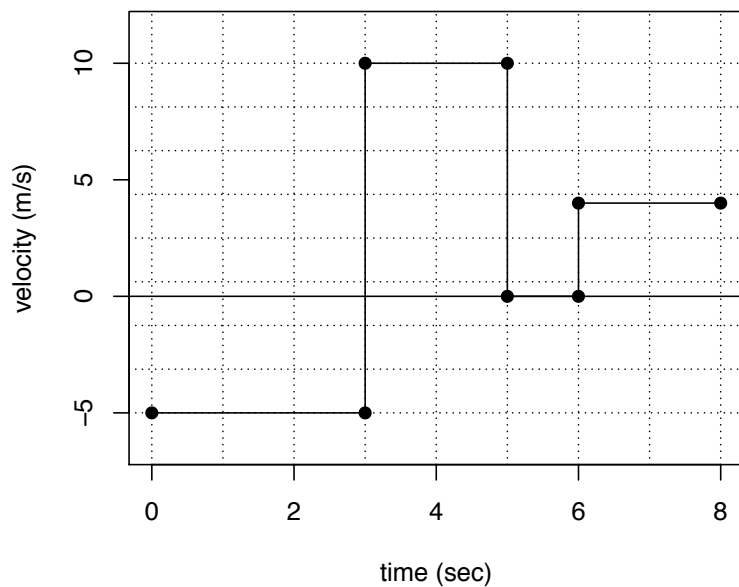

slope of section A  
-5 m/s

slope of section B  
10 m/s

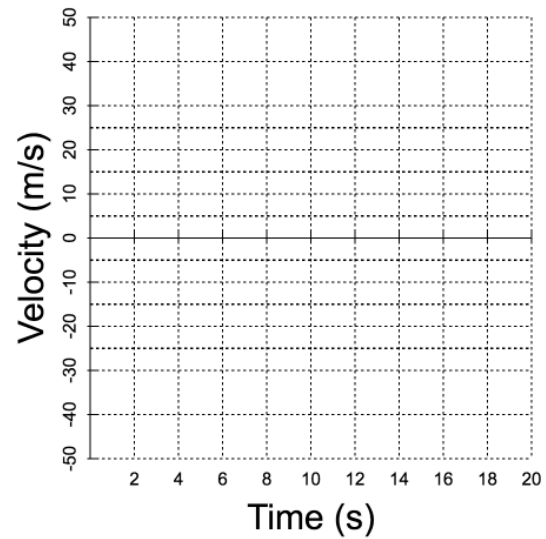

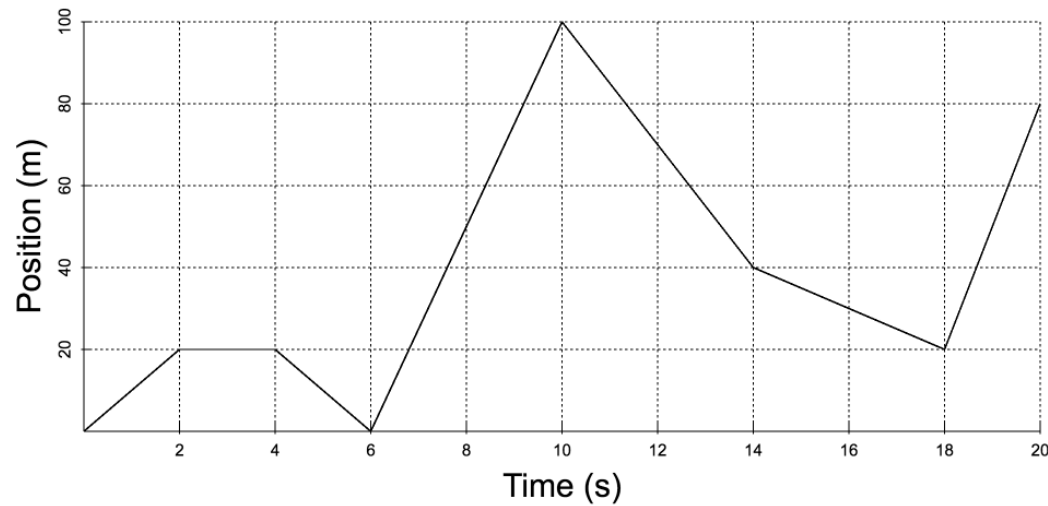

slope of section C  
0 m/s

slope of section D  
4 m/s

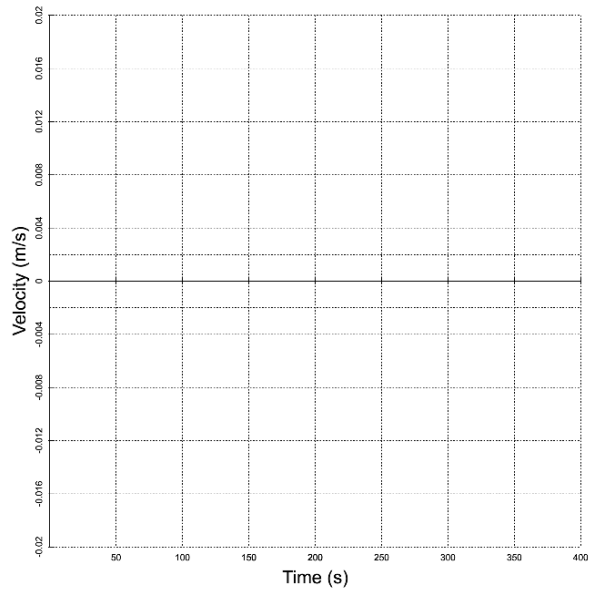

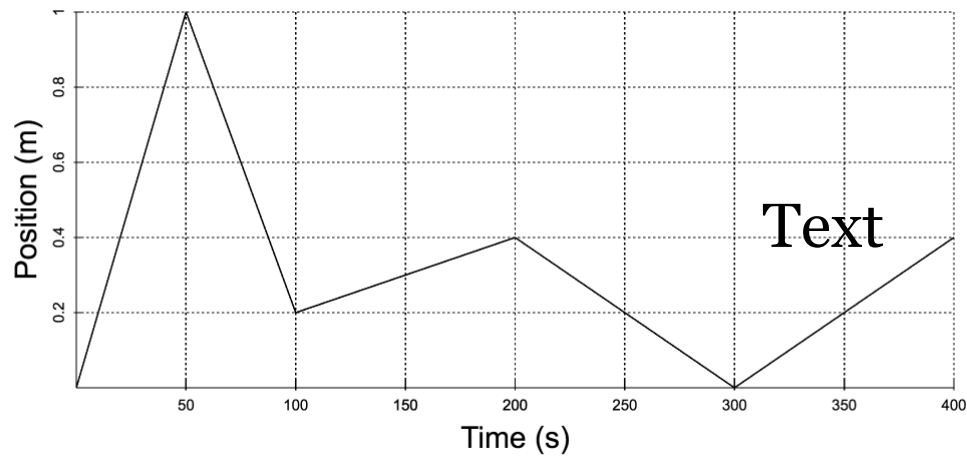

# Question 7

For the following position-time graph, create a velocity-time graph on the next page [4 points]

# Question 8

For the following position-time graph, create a velocity-time graph:

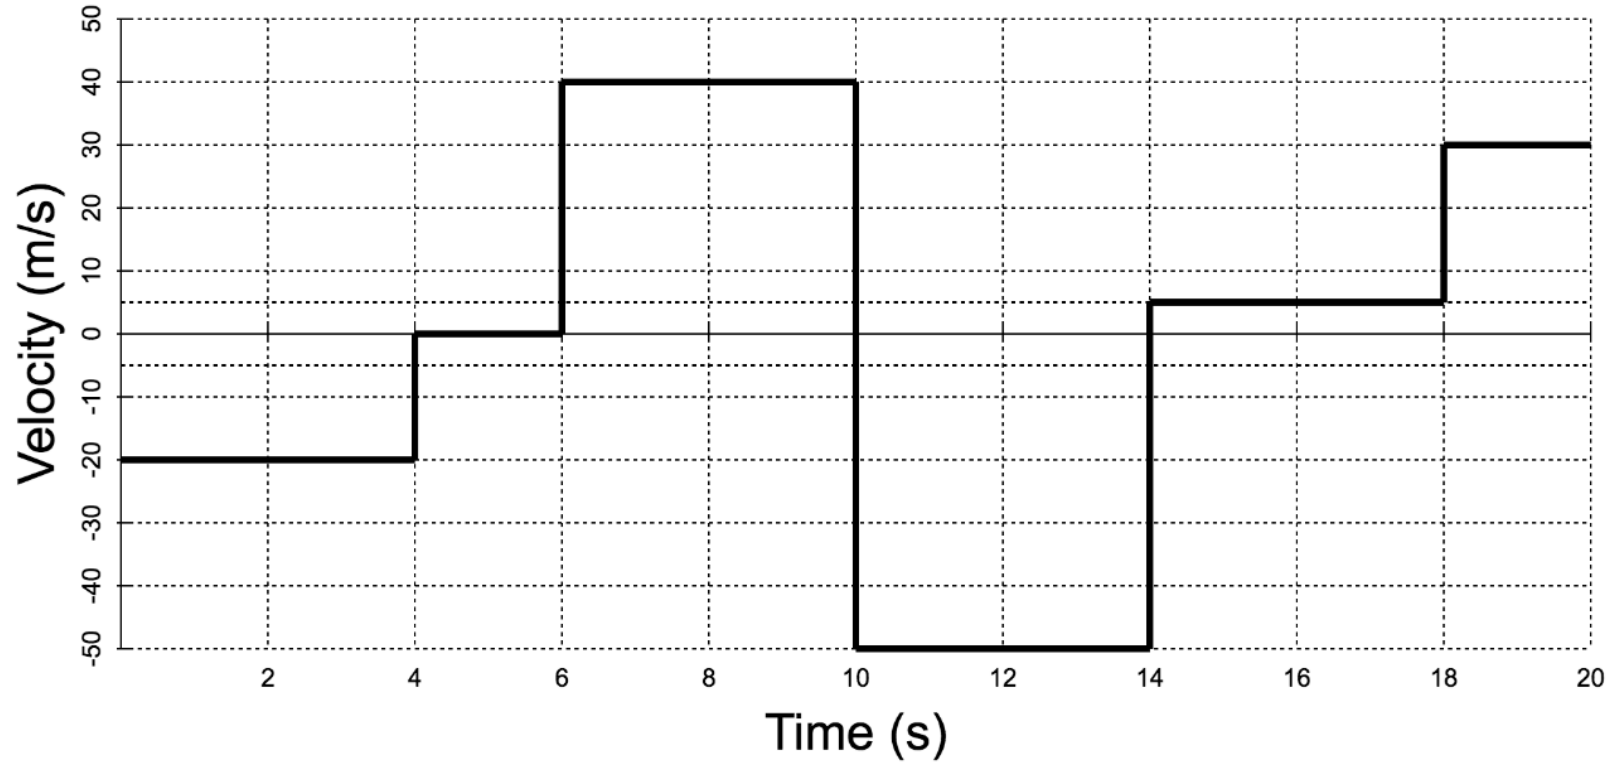

## Quantitative Graphs 2 More Problems

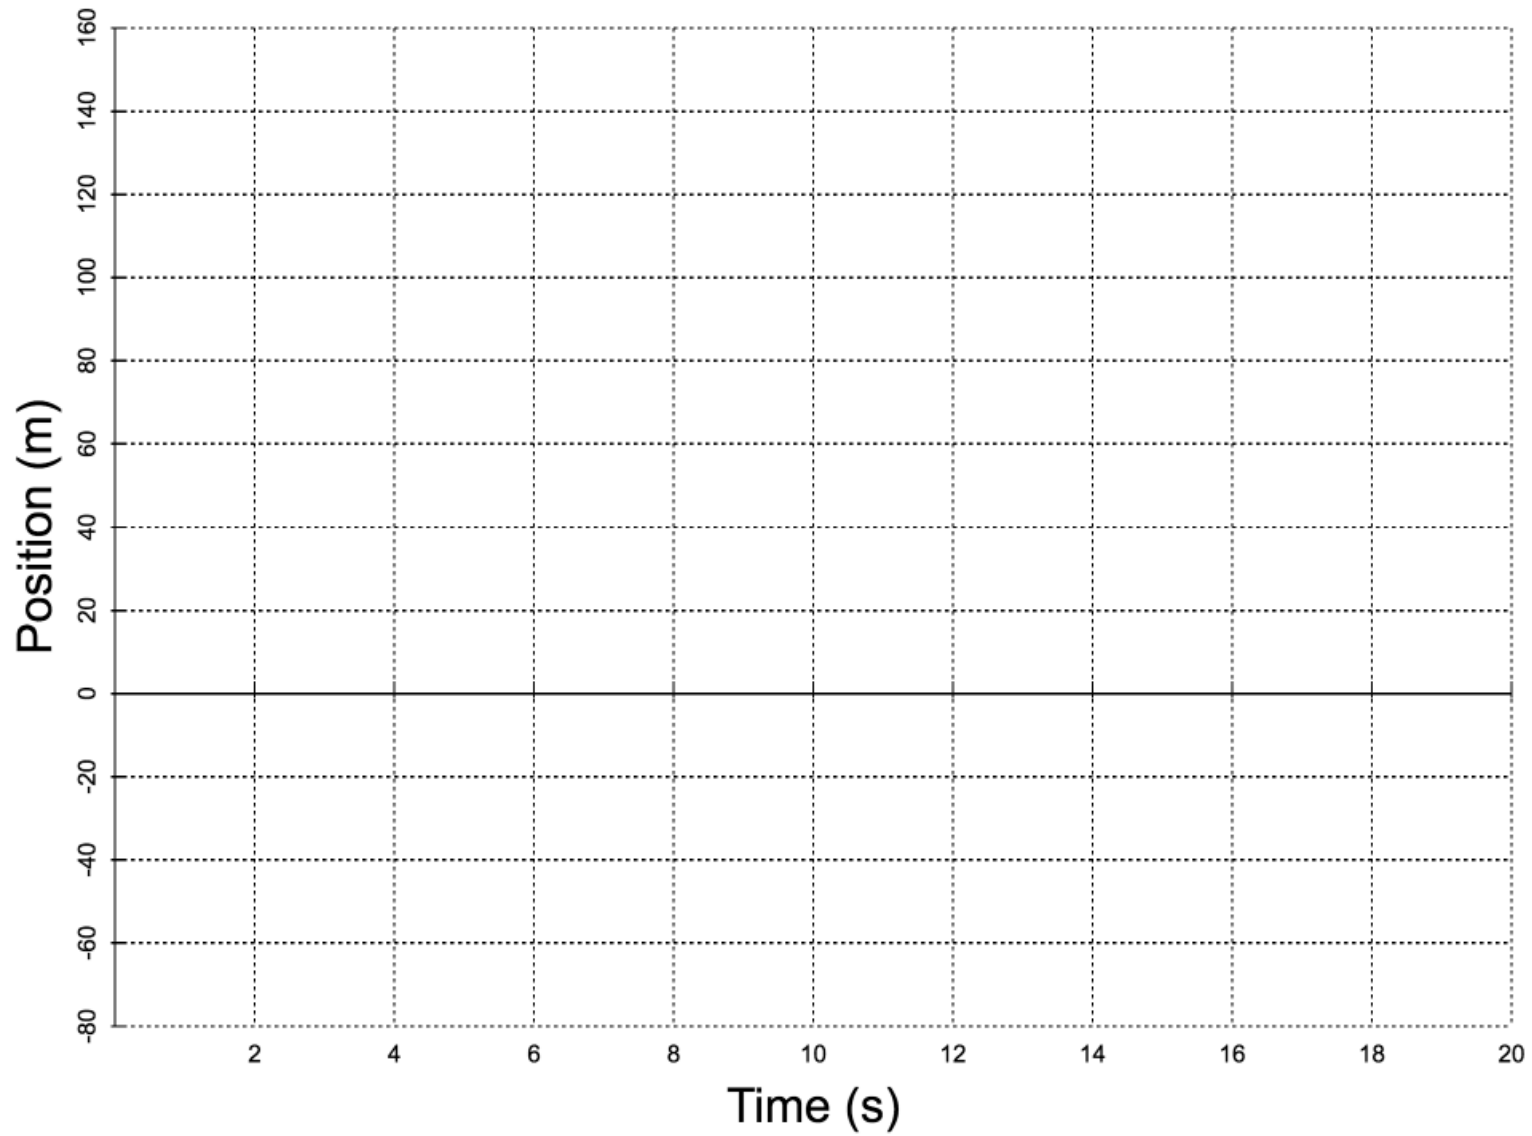

Name \_\_\_\_\_

## Question 9

For the following velocity-time graph, create a position-time graph on the next page:  
The *initial position* is equal to 60 meters

- 10.** Explain, in a few sentences the method used to solve numbers problems 1 and 2. Make sure you refer to the proper *mathematical principle* that you used, and explain the actual steps you took. [2 points]
- 11.** Explain, in a few sentences, the method used to solve problems 3 and 4. Make sure you refer to the proper *mathematical principle* that you used, and explain the actual steps you took. [2 points]

## Quantitative Graphs 2 More Problems

Name \_\_\_\_\_

Answers:

7.

Time:	Value:
0 - 2	10
2 - 4	0
4 - 6	-10
6 - 10	25
10 - 14	- 15
14 - 18	-5
18 - 20	30

9.  
points on final graph:

(0, 60)

(4, -20)

(6, -20)

(10, 140)

(14, -60)

(18, -40)

(20, 20)
